**Attachments:** wrap\_tscwg\_call\_180801\_rtowg\_GT.pptx

Hi All,

I should be to join the call about 20 to 30 minutes late. I attached edits to Mike PPT for the background O3 slide. I deleted "status" and "milestones" since work has not started on this yet. I think the key next steps are discussing possible assistance from OAQPS and including the global modeling task in the RFP and getting bids to determine the cost.

Thanks,  
Gail

Hi, Mike and all – slides look fine to me, I need to send them to Frank by early tomorrow, so Kevin and Gail, please let me know if you have any changes.

I can take care of modeling platform RFP elsewhere in agenda and plan to add hypothetical URP diagrams to "Visibility Metric Discussion" slides as part of longer discussion as shown on the agenda. (<http://www.wrapair2.org/calendar/attachments/22423/18155/18.08.01%20TSC%20Cochairs%20agenda.docx>). If Gail is on call, then she can cover those; if not, I will try to cover them.

**Subject:** slides for wednesday tsc/wg call

Hi All-

Here are some slides for Wednesday's call, based on the discussion we had last Friday. We only have five minutes for the RTOWG update, so don't want to go overboard on detail. There are three 'update slides':

- \* model year representativeness study (+ example graphic on W20 haze)
- \* future coordination with EPA OAQPS on western modeling efforts
- \* background ozone (Gail - this is currently just a placeholder from our discussion on Friday - please add to it if you like, or I can table it for next time)

Tom - I didn't mention anything about the modeling RFP - will leave that in your court if you'd like to discuss.

Tom, Gail - There's nothing here on Gail's 'hypothetical URP' that we covered Friday, but this discussion can occur outside of the RTOWG update. But let me know if you want it teed up.

Feel free to edit as you like.

thanks-  
mb
